10

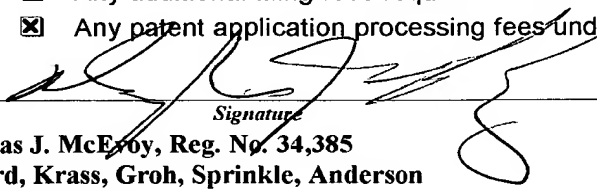

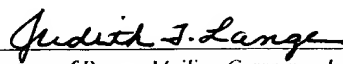

1. (Amended) A water skipping article, comprising:

a three-dimensional body having a substantially smooth edged and elliptical
outer perimeter, said body further including a side profile defined by upper and lower
elliptically extending faces which converge into said outer perimeter, and

said body exhibiting a smooth and continuous exterior surface and further
defining a hollowed and interior cavity suspended within said body, said body further
including substantially elliptical and interiorly extending surfaces defining said
interior cavity;

wherein, upon a user launching said article in a substantially horizontal
trajectory and with a specified rotational spin, said interior cavity causing centrifugal
